Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 54 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Swirhun et al [USPAT 5,631,988].

Swirhun et al show an electric connector 101; optical transmission means 135 [fig. 2a]; an optical conversion device 105; wherein the optical transmission means and the optical conversion device are fixed such that the optical transmission means is undisconnectedly coupled to the optical conversion device, and the electric connector has a first connector [a bottom surface, see fig. 2b] and the optical conversion device has a second connector [a top surface], wherein the first and the second connectors are able to be connected and disconnected.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Further references of interest are cited on Form PLO-892, which is attachment to this office action.
